DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Agent Mark S. Williams on April 4, 2005.

The application has been amended as follows:

Please cancel claims 135-185.

Allowable Subject Matter

Claims 89-97, 99-119, and 121-134 are allowed.

The following is an examiner's statement of reasons for allowance: Statement of allowance is in reference to independent claims 89, 111, 133, and 134. All other claims are dependent on these independent claims.

The present application is directed to a method for visually configuring a computer system or measurement system by providing the user with an image of the computer system or measurement system. In particular, independent claims 89, 111, 133, and 134 recite the patentably distinct feature that the component options of the

Art Unit: 3625

configurable components of the system are displayed in the image of the system when a user selects a particular component for configuration.

Discussion of most relevant art:

i) *US Patent 6,167,383* to Henson. Henson discloses configuring a personal computer system using drop down menus. Henson does not teach providing an image of the configured system.

ii) *US Patent 6,083,267* to Motomiya et al. hereinafter referred to as Motomiya.

Motomiya discloses configuring an accessory such as a necklace. Motomiya also discloses providing a user with an image of the configured necklace (Figures 6A and 6B). However, Motomiya fails to teach that the component options of the configurable components of the necklace are displayed in the image of the necklace when a user selects a particular component for configuration. Motomiya teaches that the component options are outside the image of the necklace (Figure 6A, items "61" and "62").

iii) *IBM Technical Disclosure Bulletin, June 1994 TDB-ACC-NO: NA9406243* hereinafter referred to as IBM. IBM discloses a method of configuring products using drag and drop techniques. However, IBM does not disclose that the components options of the configurable components of the product are displayed in the image of the product when a user selects a particular component for configuration.

iv) *WO 00/57254* to Laser Optronics hereinafter referred to as Laser. Laser discloses a method of configuring jewellery over a communication channel. This disclosure fails to antedate the Applicant's priority date of February 7, 2000.
